This is a field studies course taught overseas; refer to the sample itinerary.

Course Description

This course focuses on the intersection of *People, Planet and Profit* in our global efforts to create a more sustainable and progressive society for all. The foundation for sustainable development is the Quadruple Bottom Line, incorporating socio-political, environmental, economic, and ethical dimensions. We use location-based case studies (modules) in an experiential-based approach that combines educational travel, active engagement, lectures, seminars, and applied exercises in the overseas destination(s). These countries are selected because they contain some of the most diverse ecosystems and highly progressive cultures that enable us to better understand the sustainable relationship of humans and their environments. Some pre- and/or post-departure assignments may be required (refer to the Course Requirements section in this syllabus as well as the itinerary).

Course Prerequisites, Corequisites and Cross-listings

There are no prerequisites and all students in good academic standing are eligible to take the course. This course fulfills the requirements of Anthropology (ANTH), Ecology (ECOL), Forestry and Natural Resources (FANR), Geography (GEOG) and/or International Affairs (INTL) at the undergraduate (4271) or graduate (6271) levels. As always, confirm with your advisor how the course will count in your program of study. When registering, select only FANR 4271 or FANR 6271 for 3 or 6 credits.

Course Objectives and Learning Outcomes

To evaluate the complex relationships between People (human culture), Planet (natural environment), and Profit (business community), you will:

1. **Demonstrate knowledge** of the intersection of the natural, cultural and business environments throughout the regions of study

Revised April 6, 2024

- a. Pre-recorded lectures
 - b. Lectures
2. **Apply this knowledge** to understand the complexity of sustainability
 - a. Seminars
 - b. Field studies
3. **Critically evaluate this knowledge** by developing a moral framework and an understanding of how societies can progress
 - a. Socio-scientific issues (SSI) simulations
 - b. Thematic essay
4. **Conduct yourself** in a manner consistent with Discover Abroad's Professional, Academic, and Ethical Code of Conduct.

Graduate and Honors Option Credit

Students who wish to take this course for honors credit will be required to register for the graduate version of the Course and complete "Additional Course Assignment for Graduate Credit and Honors Option" (see below). Questions about graduate course credit and how it works with your honors program of study may be directed to the [Honors Program](#)

Participation Policy

Punctual attendance at all scheduled program-related activities is required, including group meetings, discussions, field excursions, as well as lectures and any other scheduled activities. Participation in educational field activities (such as hiking, snorkeling, swimming, etc.) is voluntary and at the discretion of the student; however, should you wish not to participate you must inform the instructor and an alternate education non-field activity will be assigned. An excused absence or decision not to participate in one or any of these field activities will not affect your course grade. During the field studies, no student may leave the group without the consent of the faculty supervisor. Unless an absence is approved by one of the instructors, students will lose 10% of their final grade for each day or part-day they fail to participate. Unexcused absences or chronic late arrival to program activities may be grounds for dismissal from the program.

Academic Honesty

As a University of Georgia student, you have agreed to abide by the University's academic honesty policy, "A Culture of Honesty," and the Student Honor Code: "I will be academically honest in all of my academic work and will not tolerate academic dishonesty of others." A Culture of Honesty, the University's policy and procedures for handling cases of suspected dishonesty, can be found [here](#). All academic work must meet the standards described in the [University's Culture of Honesty policy](#). Lack of knowledge of the academic honesty policy is not a reasonable explanation for a violation. Questions related to course assignments and this policy should be directed to the instructor. Unless explicitly stated, artificial intelligence-based technologies, such as ChatGPT, must not be used to generate responses for student assignments.
